

Serial No.: 09/756,288
Atty. Docket No.: P66317US0

B1 the spirit and scope of the invention will become apparent to those skilled in the art from this detailed description.--.

[On page 10, please amend the second full paragraph to read as follows:

B2 --Another suitable inner member which is arrangeable between the foreskin and the corona of a penis or solely on the corona of a penis, e.g., in the absence of foreskin in case of circumcising, comprises a plurality of leaves connected to a housing. The leaves are comprised of a film having an adhesive layer on their interior surface thereof to secure an attachment of the device to the corona of the penis. Preferably, the film as well as the adhesive layer is vapour permeable to increase the comfort of the wearer. An inner member of this kind is disclosed in [US] U.S. Patent No. 5,263,947, the entire disclosure thereof being incorporated herein by reference.--

[On page 28, after the last line, please insert the following paragraph:

B3 --The invention being thus described, it will be apparent that the same may be varied in many ways. Such variations are not to be regarded as a departure from the spirit
